

Agricultural Innovations – Livestock Translator

ANNCR: Agricultural Innovations that never took off.
The Livestock Translator.

In 2010, a device that converted cow's moos
into English phrases was created.

SFX: Mooooo.

COMPUTER: I am hungry.

ANNCR: But it never took off because it made milking
them uncomfortable.

SFX: Moooo.

COMPUTER: Oh yeah. That's the stuff. Thank you. Yes.
Yes. Yes.

ANNCR: Catch up with the innovations that did take off
with a short one-or-two-day course at The
Muresk Institute.

Authorised by the State Government, Perth.

Agricultural Innovations: The Cock-A-Doodle-Do-Not-Sleep-In

ANNCR: Agricultural Innovations that never took off:
The Cock-A-Doodle-Do-Not-Sleep-In.

Farmers once relied on roosters to wake them.
But if their rooster slept in, so did they.

SFX: Snoring.

ANNCR: An inventor created an alarm clock for roosters
that'd wake them up in time to wake up farmers,
but that rooster needed a rooster to wake them
in time to wake up the farmer and so on.

SFX: Alarm. Rooster wakes up and crows. Another
Rooster wakes up and crows. Another and another
and another.

FARMER: Shush. Shush. Shush. Shush.

ANNCR: Catch up with all the agricultural innovations
that did take off with a short one-or-two day
course at The Muresk Institute.

Agricultural Innovations: The CareCrow

ANNCR: Agricultural Innovations that never took off:
The CareCrow.

Working on a field gets lonely, so an inventor
came up CareCrow: the Scarecrow that talks to
while you work.

COMPUTER: How's your day been, mate?

ANNCR: But it didn't take off because talking
scarecrows are terrifying.

COMPUTER: Stay with me forever and ever. Come back. Come
back. Come back. Come back.

ANNCR: Catch up with all the agricultural innovations
that did take off with a short diploma at The
Muresk Institute.

Authorised by the State Government, Perth.
